Number of Fellowship Training Positions per Year 3 level III fellows at a time

Applicant Qualifications / Prerequisites As per the CSE/CCS guidelines for provision of echo in Canada.

Program Description

6 Vivid 7 systems, two of which are equipped with 4D imaging
 1 Vivid I system
 2 Phillips 5500 systems in OR (to be upgraded)

5 Sonographers, Six level III trained full-time echocardiographers

Our lab has long-standing national and international reputation for training expert echocardiographers, having trained more than 40 level III echocardiographers since 1989. We are staffed by 6 full-time level III trained echocardiographers, and superb academic sonographers and work in a very collegial environment. We have one of the leading 3D echo programs in the country, as well as a strong research group into right-heart function, associated with an internationally recognized Center for Pulmonary Vascular Diseases. We have strong affiliations and collaborations with the American Society of Echocardiography and top US echo programs.
