**Number of Fellowship
Training Positions per Year** 1

**Applicant Qualifications /
Prerequisites** Completed Cardiology Training Program

Program Description Mount Sinai Hospital is offering an advanced echocardiography fellowship training program in accordance with the CSE level 3.

Clinic exposure will include transthoracic echocardiography, transesophageal echocardiography, and stress echocardiography. There will be exposure to advanced echocardiography techniques including 3D transthoracic and transesophageal imaging as well as strain analysis.

Research opportunities include myocardial mechanics in unique patient populations including pulmonary hypertension, heart failure as well as in athletes. Additional areas of focus include assessment of strain and various cardiomyopathic populations as well as valve 3D imaging.
