Number of Fellowship Training Positions per Year 2

Applicant Qualifications / Prerequisites This position is intended for individuals interested in pursuing an academic career in echocardiography.

Program Description

The University of Alberta Hospital/Mazankowski Alberta Heart Institute is currently accepting applications for a 2-year Echocardiography Fellowship position commencing July 2008. This is a 50% Research Fellowship, with focus in clinical research. The program currently performs over 7 000 studies a year and close to 1 000 transesophageal echocardiograms. Clinical training will encompass all aspects of echocardiography to include congenital heart disease, 3-D echo, contrast echo, tissue resynchronization imaging, as well as opportunity to participate in intra-operative echocardiography. Ample opportunity will also be given to participate in, as well as design and lead clinical studies in the Department with collaboration with imaging modalities, such as cardiac MRI.

Upon completion of the Fellowship, the candidate will be Level III certified, as well as have ample opportunity to complete and publish on clinical research projects that are currently being undertaken in the Department.
